

About Metis Homes

Metis Homes is a distinguished house builder with a strong track record in building characterful homes across Southern England. With a deep-rooted commitment to quality, Metis Homes delivers developments that harmoniously blend architectural excellence with community focus. From strategic land acquisition to innovative design and build, Metis Homes ensures each development is meticulously crafted to enhance its surroundings and meet the diverse needs of modern living. Known for their attention to detail, sustainable practices, and customer-centric approach, Metis Homes consistently exceeds expectations, making a lasting impact on the communities they serve.

Which processes does Metis Homes manage with Insite?

We are an SME house builder, and we initially partnered with Insite to streamline and enhance our BREL ([Building Regulations England Part L](#)) reporting. Ensuring compliance with BREL standards is crucial for us to meet energy efficiency and sustainability targets in our new homes, and Insite has quickly become an invaluable tool in helping us manage this process effectively.

How has Insite helped to improve these processes?

- 1 Solution 1 - Compliance**

With BREL reporting being a new regulatory requirement, we needed a system that could help us achieve compliance from day one. Insite provided us with an efficient way to collect, document, and manage all required data, ensuring we meet the BREL standards consistently and without hassle.
- 2 Solution 2 - Organisation**

Adopting Insite has significantly streamlined our BREL reporting process. Previously, without a dedicated system, managing new regulatory requirements would have required manual work, which is both time-consuming and prone to errors.
- 3 Solution 3 - Reliability**

Insite provides us with a reliable, centralised platform for all our BREL reporting needs. By consolidating all documentation in one accessible digital space, Insite reduces the chance of lost or misplaced records and ensures that our team can easily retrieve information whenever needed.

How does the inspection completion time using Insite compare with other systems you've used?

While we haven't used other applications specifically for BREL reporting, Insite has distinguished itself by helping us achieve compliance seamlessly. Before we adopted Insite, our BREL inspections involved largely manual processes, which would have been time-consuming and difficult to standardise. Insite has allowed us to streamline these inspections, making it faster and simpler to input, store, and access all the necessary information in one place.

Who uses Insite in your team and how has it improved communication?

We primarily use Insite internally to collect and organise all the necessary data for our BREL reports. This information is gathered within our team, allowing us to maintain a high level of accuracy and consistency before sharing it with external partners, specifically our SAP Assessors. Insite has greatly improved our communication with these assessors. Previously, sharing information involved manual processes and multiple files, which could lead to miscommunication or delays.

Does computer access to your inspections enhance utility, and if so, how?

Absolutely, having the ability to access our inspections on the computer has been incredibly useful. Viewing inspection data on a larger screen allows us to analyse information in greater detail and ensures nothing is overlooked. This accessibility has been especially helpful for reviewing BREL reports, as we can quickly check that all necessary data is complete and accurate before sharing it with external partners. Accessing inspections on the computer also enhances collaboration within our team. It allows multiple team members to review, update, or discuss inspection data in real time.

How much time and money do you save each month?

While we didn't have a previous system in place for direct comparison, we can confidently say that Insite has brought significant value to our operations. When we first engaged with Insite, we carefully evaluated their offering against other suppliers, and Insite stood out, not only for its robust features but also for the professionalism and transparency in how they conduct business. Insite's streamlined approach to BREL reporting has undoubtedly saved us considerable time that would have otherwise been spent on manual data entry, document organisation, and back and forth communication.

"Insite has transformed our approach to **BREL reporting**. It streamlines data collection, **ensures compliance**, and saves us time by eliminating manual processes, allowing us to focus on delivering high-quality projects."

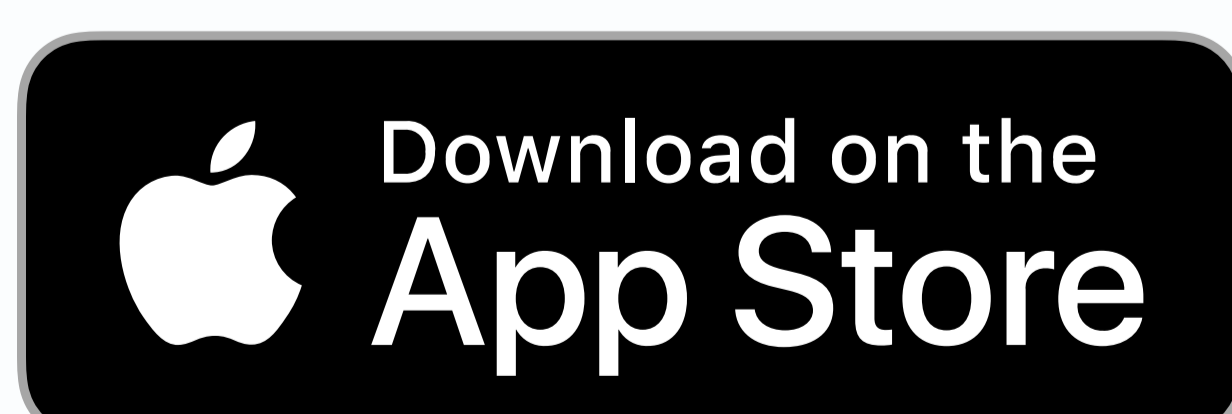

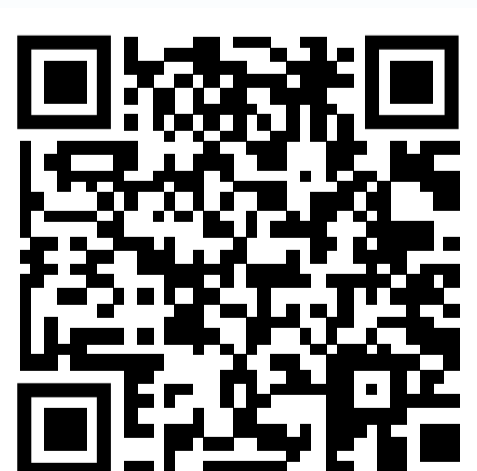

Fiona Woodham

Construction Administrator / Fiona.Woodham@metishomes.co.uk

Fiona has been with Metis Homes for 5 years, working within the busy construction department. With a career in property covering house building, development, agency and maintenance Fiona's diverse and varied skill set mean that she's perfectly placed to 'fill the gaps' and support the running of the construction side of the business.
